

Welcome to
the world of **KENZO**

Kenzo is a revolutionary paint protection coating that contains 100% silica providing the highest level of gloss and protection. It's backed by an official warranty provided by IGL Coatings, supported by certified IGL Coatings Master Applicators. It forms a layer of thick coating that radiates a rich and natural glow reminiscent of a bespoke wax while providing unmatched protection. Running your hands across a Kenzo coated car is like touching soft luxurious silk. It will never be the same again.

Features of KENZO

Benefits

Increased Gloss

It took an entire year of development to create Kenzo. The combination of skilled paint correction and professional Kenzo application is the perfect formula to enhance the rich and natural gloss of the paintwork. Kenzo will make heads turn.

Self Cleaning

Kenzo's self cleaning effect is thanks to its amazing hydrophobicity which comes from the coating's ability to create a very low surface tension. Dust, dirt, tree sap and contaminants sit on top of the coated surface and are easily washed off with water. Contaminants that do manage to attach to the coatings are removed effortlessly without the need to use any aggressive mechanical process.

Protection

Dead bugs and bird droppings are the bane of all paint. They are highly acidic and if left long enough, will cause permanent damage to your paint. Traditional waxes and sealants are unable to protect against them. When bird droppings dry under the heat of the sun and moisture is added back to it, the etching process begins on the paint. With the high acid resistance of Kenzo, dead bugs and bird droppings will no longer be able to damage the paintwork.

Reduces Micro Marring

Marring happens when you wash, dry, or even touch your paint. IGL Kenzo is proven to resist marring when properly maintained and cared for. During the lifetime of Kenzo, it is crucial for your vehicle to be maintained by your Authorized Kenzo Installer who will use proper techniques to uphold you Kenzo's protective properties.
